

## WHY ELAPROMED?

Elapromed is the most advanced European system for skin rejuvenation, offering non-intrusive deep delivery of highly active vital compounds. Elapromed's great benefits are:

### **Short treatment time.**

Dramatic results in a comfortable 25 minutes, possibly over lunch, for active women.

### **Proven Results.**

In-vivo and in-vitro research conclusively prove Elapromed's stated skin rejuvenation benefits.

### **High Absorption.**

Up to 70 ml/cc of active compounds are absorbed deep into the skin during one treatment.

### **No parabens, artificial colours, or fragrances.**

The system's corrective cocktails are intelligent....no unnecessary ingredients, and only those powerful natural actives necessary to get the results.

### **Natural active ingredients.**

Botanical stem-cells and vital actives combined in the most advanced proprietary formulations that address the main face, body, and scalp concerns.

### **Painless procedure.**

Very low voltage Elapromed equipment stimulates the skin to open up the dermal water channels and allow for high actives absorption with no discomfort.

### **No risk of scarring.**

Because the skin is never broken in the procedure, scarring and other abrasive effects are not possible.

### **No downtime.**

Your skin looks greatly improved immediately after the treatment, and you can go back to your normal activities.
